As part of CSAP's RADAR (Regional Alcohol and Drug Awareness) Network, the CASAT (Center for the Application of Substance Abuse Technologies) Clearinghouse provides services within eight identified service areas. The following is a partial list of services:

- Maintain and provide access to a fully functioning substance abuse resource library
- Provide information and referral services
- Conduct outreach activities to identified prevention services and others as appropriate
- Develop promotional activities around local, state and national campaigns
- Provide assorted substance abuse prevention materials from NCADI (National Clearinghouse for Alcohol and Drug Information) and other appropriate sources
- Provide feedback to CSAP about unique local, state and regional needs, activities, data and publications

NCADI is the primary source for current science-based prevention information and resource materials for the RADAR Network centers. Each State RADAR Network Center receives an updated list and copies of new materials quarterly. The following is a partial list of new NCADI publications. The item's inventory number prefaces each title.

2. BKD406 "CSAP Cultural Competence Series No. 9 Health Promotion and

Substance Abuse Prevention Among American Indian and Alaska Native Communities: Issues in Cultural Competence"
